AGRICOLA
1933
YEAR BOOK

ARKANSAS POLYTECHNIC COLLEGE
Published by the Students of
ARKANSAS POLYTECHNIC COLLEGE
Russellville, Arkansas
In appreciation of his interest in the welfare of the students, individually and collectively, and in recognition of the outstanding service which he is rendering Arkansas Tech, the staff dedicates this volume of the Agricola to President J. W. Hull
CATION
That this book, which has been intended as a permanent pictorial record of one of the happiest years of our lives, may provide now and in after years a basis of memories of cherished associations is the earnest wish of the Agricola staff.

THE PRESIDENT

BY WOODROW PETTY

Joseph William Hull, president of Arkansas Polytechnic College, came to the college in March, 1932. Mr. Hull brought with him an outstanding record as a teacher, business man, and community builder. A graduate of Mississippi A. and M. and of the Peabody College for Teachers, Mr. Hull taught vocational agriculture for thirteen years.

Studying the problems of agriculture continually while teaching, Mr. Hull organized at Danville the first chapter of the Future Farmers of America in this state. Glen Farrow, Star Farmer of America in 1931, was a student under Mr. Hull. Farrow credited the most of his success to Mr. Hull, his Smith-Hughes instructor. In 1929, Mr. Hull was selected as the "Master Teacher" of vocational agriculture in the Southern states, and the same year the Danville F. F. A. chapter won third place and a $200 prize in the National F. F. A. convention. The following year the chapter took first place money of $500.

Since coming to Arkansas Tech to take over the task of directing the mill that grinds out future citizens of Arkansas, Mr. Hull has not slackened pace but has only spurred on to greater efforts. Practicing economy in every move, Mr. Hull has caused Tech to take on a neater appearance. He has rebuilt the agriculture and science hall, built a new athletic field, remodeled and improved the dormitories, remodeled the offices in Main, bought new steel stacks for the library, and built new sidewalks. He has operated the college within its income during one of the worst years of the depression, and has provided for a new boys' dormitory. His leadership has inspired the students on to higher scholastic achievements until the report of the North Central Association about Arkansas Tech declares that "everything is highly satisfactory."
Although regretting the retirement from the Board of Trustees of Colonel Henry Stroupe of Paris, President of the Board, and J. B. Paine, of Van Buren, Secretary, after more than twenty years of service, students and friends of the institution feel that Arkansas Tech is exceptionally fortunate in the appointment of W. H. Johnson, of Fort Smith, and Mrs. Ethel Cole Cunningham, of Dardanelle, to fill the vacancies. Mr. Johnson, who is widely known and respected as a banker and businessman, has been actively interested in school problems for many years and has a broad knowledge of school conditions and needs in western Arkansas. Mrs. Cunningham, who for the past two sessions has been the sole woman member of the state legislature, has the respect and confidence of the entire state because of her knowledge of public affairs and her concern for the educational welfare of Arkansas boys and girls.

Of All the schools I love the best,
   A. P. C., my A. P. C.
To thee I'll cling and stand the test,
   A. P. C., my A. P. C.
With friendship, loyalty, and cheer
I'll serve my brothers far and near,
And hold thy precepts ever dear,
   Alma Mater; A. P. C.

So louder now we'll swell the strain,
   A. P. C., my A. P. C.
Inspire our hearts, thy heights to gain
   A. P. C., my A. P. C.
Let truth and honor be the goal,
Exalt the life, make sweet the soul,
While thousands sing from pole to pole
   Alma Mater; A. P. C.

The Old Dormitories for Boys

ARKANSAS POLYTECHNIC COLLEGE
A loan of $67,000 from the Reconstruction Finance Corporation to Arkansas Tech will permit the changing of the three boys' dormitories into the beautiful, modern building pictured above.

The loan is sufficiently large to provide an entirely new dormitory. The interior of the present dormitories will be wrecked completely and built back, fireproofed, modernized, and remodeled. The capacity of the dormitory will be increased to 210 students by the addition of the wings from the West dormitory to the North and South dormitories. The court created by the U-shaped hall will be landscaped, a small pool constructed, and other beautification steps taken.

One-half of the first floor in each of the smaller dormitories will be created into lounges, or recreation rooms, and the other half of the floor will be converted into apartments for the professors who will reside in the dormitories.

College officials state that the dormitory will be one of the finest in the state when completed. Work will start on the project immediately after the regular session and the building will be completed in time for the regular 1933-34 session.
