FOREWORD

If, at some future time, glancing through this volume brings to you memories of the days spent at Tech, this annual shall have achieved its purpose.
To the student body of Tech, whose school loyalty is unsurpassed, we dedicate this volume as a slight evidence of our appreciation.
CONTENTS

ADMINISTRATION
CLASSES
PERSONALITIES
ATHLETICS
ORGANIZATIONS
The administration building contains classrooms, school museum, and the offices of dean, registrar, president and other members of the faculty. Squarely facing the street, it impresses the newcomer at once, and because of its beauty, remains in his memory.
Caraway Hall, resident hall for women students, is one of the newer buildings, and offers modern quarters for all women students, and is, of course, the focus of the boys’ attention.
The boys' dormitory, completely modern, offers superior living quarters for 210 students. It was remodeled by adding connecting wings to the three dormitories formerly in use. It also contains apartments for the dean and assistant dean of men.
Bailey hall contains class rooms of agriculture, sciences, and faculty offices. The entire first floor has been remodeled and occupied with laboratories of chemistry, dairying, and soils.
The library was put into use in 1936. It is well equipped, lighted and has been enriched with books through the Carnegie Endowment until it ranks well up among the best in the state.
DINING HALL
The dining hall, using student labor almost entirely, has been enlarged to meet increased enrollment, and now presents a much improved appearance, inside and out. It is frequently used as a banquet hall by various outside organizations.
The Home Economics building houses the home economics classrooms and the college infirmary, located on its third floor.
The faculty apartment building, formerly a girl's dormitory, was remodeled to fill the requirements of those faculty members wishing to live on the campus.
The physical education building, put into use only this year, offers equipment for teaching this subject, offices for the teachers, class rooms, and a large floor space for indoor sports. It also contains the college post-office, bookstore, and the place known to everyone—the Techionery.
